**The new INDUS vertical**

**- Proven technology now transmitting vertically! -**

*Partner in Performance*

- 1. Main facts**
- 2. Description**
- 3. Set-Contents**
- 4. Helpful info**
- 5. Contact**

*Proven technology now transmitting vertically!*

- No influence by external signals
- For overhead doors up to 6 m
- Low power consumption
- Quick response and switching time
- Ready for PL "e" according to EN 13849
- Highly integrative (almost invisible installation)
- Monitoring of slack cable device and flap door contact

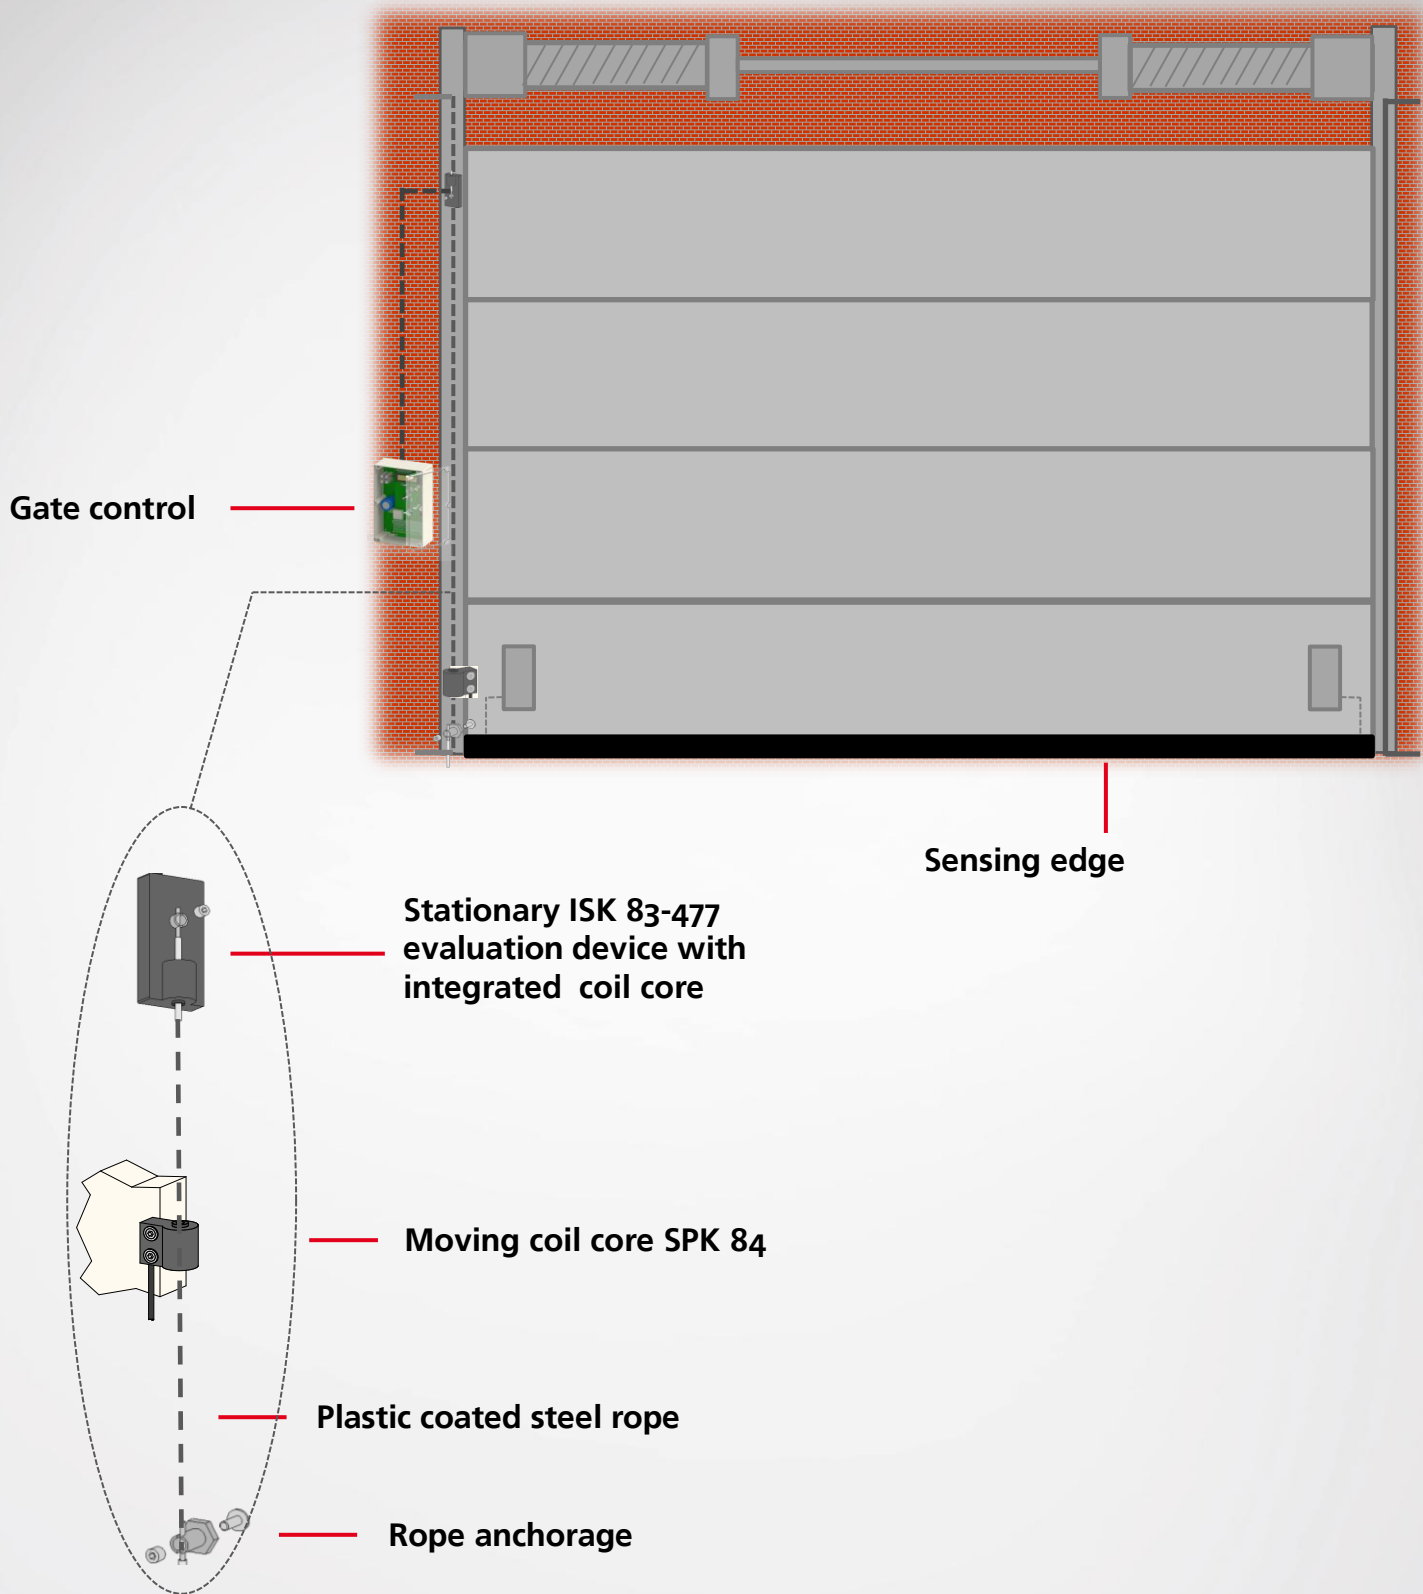

*Proven technology now transmitting vertically!*

- **Contact free, maintenance free and long lasting**
- **Permanent analysis of contact edge and other switches**
- **Working with resistor and optical edges**
- **Adapts itself to the end position angle**

*Partner in Performance*

## *INDUS vertical basic Set*

### Most important components:

- **1 x Safety evaluation device with integrated coil core ISK 83-477**
- **1 x moving coil core SPK 84 for 8K2- or optoelectronic sensing edges**
- **1 x SPE 8 terminal box**
- **1 x 8 m steel rope for transmission**
- **1 x rope anchorage set**
- **Ready for PL "c" or "d" according to EN 13849, depending on featured equipment**
